CUSTOMER FOCUSED, QUALITY DRIVEN

UTILITY SOLUTIONS

WE ARE YOUR TOTAL UTILITY SOLUTION

State Electric Supply Co. provides a complete product and service offering for applications in the generation, transmission and distribution of electrical power. From high voltage cable and transformers to insulators, poles and cross arms, we are your source for the selection and application of utility products.

We sell to varied customer categories, whether it be mining, utility industries, or electrical contractors. Our products, product lines, and services can fit your specific customer need.

Our utility market offers several product categories such as distribution equipment, fuses, hand tools, wire, safety equipment, and more. Each product has options that will work for your utility needs. ACSR wire sizes range from 2 AWG to 795 AWG and power fuses up to 69KV. We also provide accessories to your fuses, wires, and generators, servicing your utility project from start to finish.

Utility Solutions

SMALL QUANTITY SHIPMENTS

Unlike many distributors of utility products, we do not require customers to order in large quantities. If you need a small quantity of products, explore our utility inventory.

HIGH VOLTAGE PRODUCTS

We sell and support most of your distribution class utility product needs from our local inventories.

QUALITY PRODUCT LINES

The quality and variety of our utility product lines is unmatched. Hubbell, MacLean, and S & C Products are just a few of the brands we offer.

STAGING MATERIAL

We will keep all the inventory in one of our warehouses until the customer needs it or until it all arrives. Then we will deliver it to your location.

QUICK ORDER

We have inventory on hand locally, which means you can look to State Electric if you need an item quickly.

WIRE SOLUTIONS

We offer a wide array of wiring products, from wire itself to connectors, conduit, accessories, and wire protection.

NO MINIMUM ORDER

Buy exactly what you need with no minimum order required for purchase.

UTILITY SPECIALISTS

Our greatest asset is our staff—we have experts on the utility market that can assist you with your orders and answer any questions.

CASE STUDY

Substation Packaging Capabilities

End User: Big River Steel

Location: Osceola, AR

Engineering Consultant: Primetals Technologies
USA

Situation

Big River Steel is a state of the art flex steel mill in Osceola, AR that was in the beginning stages of construction. The substation design presented build site and delivery challenges for the contractor that would require material to be packaged and dropped in multiple staging areas.

Solution

State Electric Supply Co. was awarded the Electrical Bus Material for Big River's 34.5 kV Substation. For this project we were tasked to provide on time delivery and packaged material for each phase that included easy to follow packing slips for the customer.

We utilized our warehouse space and Total Warehouse Logistics program to provide 100% accuracy and accountability for each skid/crate that was packed, labeled and shipped. The material was successfully delivered on time to each drop site and staged for construction.
